

EV Questions Answered

How often is routine service?

At 7,500 miles a recommended car service consists of an inspection and tire rotation. No oil change!

What is the range on an EV?

Most travel over 200 miles on a charge. Just like a combustion engine, the mileage depends on how you drive.

Can an EV perform?

Yes! EVs are quiet, handle beautifully, and produce instant torque, which creates great acceleration. The Tesla3 goes from 0-60 in 3.6 seconds.

How much does an EV cost?

There is currently a federal tax credit of \$7,500 for many models and a MA rebate up to \$2500. On average, an EV costs half as much to drive, and even less if you are charging at home with solar!

Do I need to install an expensive charger in my house?

No! Your EV will come with a 120V charger, which plugs into any household socket. You can choose to install a 240V (level 2) charger, which charges the car four times faster. A level 2 charger costs about \$500 and requires an electrician to wire it.
